

30 April 2016

The fund aims to provide long term growth by investing in European equity markets, including the UK. The fund typically holds a concentrated portfolio of stocks and is actively managed by our investment team, who will select stocks, without reference to index weight or size, to try to take advantage of opportunities they have identified. Due to the unconstrained nature of the fund investors must be willing to accept a relatively high degree of stock specific risk.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment. The fund may use derivatives to reduce risk or cost, or to generate additional capital or income at low risk. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks. The value of assets held within the fund may rise and fall as a result of exchange rate fluctuations.
